

# HEALTH-X dataLOFT

## Legitimized, open, and federated dataLOFT Platform

Health-X dataLOFT places citizens at the center of the distribution, use and control of their own health data. The aim is to develop transparent cloud-based applications in accordance with Gaia-X standards in highly relevant areas of healthcare, such as health prevention, healthy aging, or clinical care. Complementary to the existing classic offerings in vendor-bound silos, Health-X dataLOFT implements a vendor-neutral platform to enable access to and integration of data from the first and second health markets.

In four use cases the project demonstrates the opportunities that arise from the combination of health data from the primary and secondary health market: Self-determined everyday health, clinical companions, personalized health services and secondary use of data. Thus, new business models will evolve. Patients have transparent access and full control over their health data and can decide how the sensitive data is used. They can also choose to contribute their data to health research.

<b>Domain</b>	Health
<b>Start</b>	November 2021
<b>Term</b>	3 years
<b>Funding amount</b>	13.013.505,20 €

<b>Consortium management</b>	Charité – Berliner Institut für Gesundheitsforschung (BIH) Mr. Prof. Dr. Roland Eils
------------------------------	---

<b>Press contact</b>	Mrs. Sarah Wächter / Mr. Carsten Canitz E-Mail: <a href="mailto:info@health-x.org">info@health-x.org</a>
